PROFILE SUMMARY

Results-driven Software Developer with hands-on experience in full-stack web development, cloud infrastructure, and database administration. Proficient in the MERN stack, AWS services, and CI/CD pipelines, with a proven ability to deliver scalable, secure, and high-performance applications. Demonstrated success in both corporate and freelance environments, with impactful contributions to client projects, hackathons, and real-world applications serving 500+ daily users.

WORK EXPERIENCE

Godrej Infotech Ltd.

Apr 2025 - Present

Cloud DBA Intern

- Managed over 20 Amazon RDS instances and 28 on-premises servers for MySQL and PostgreSQL, ensuring 99.9% uptime and implementing automated backups and performance tuning across both cloud and on-premises environments.
- Performed database administration tasks including user access control, schema design, and query optimization for MySQL and PostgreSQL, supporting both cloud-native and legacy systems.
- Collaborated with 3+ cross-functional teams to monitor and secure database infrastructure using AWS CloudWatch, IAM policies, and routine audits, reducing incident response time by 30%.

Fyregig

Jan 2025 - Mar 2025

React Developer (Freelancer)

- Developed and deployed a responsive React.js application for client operations, improving user engagement by 35% through intuitive UI/UX and seamless navigation.
- Implemented a CI/CD pipeline using GitHub Actions, reducing deployment time by 60% and enabling automated testing, build, and deployment to AWS EC2.
- Configured and managed AWS infrastructure including EC2, S3, and Route 53, ensuring 99.9% uptime and secure, scalable deployment of the web application.

PROJECTS

LITTO- Garbage Management Web Application | NodeJS

Repository

A comprehensive solution for efficient garbage management to enhance urban cleanliness.

- Developed a scalable Node.js application with role-based authentication for residents, collectors, and administrators.
- Designed a task management system that reduced task allocation time by 30%, cutting average response times from 10 minutes to 7 minutes.
- Implemented collection scheduling and special pickup request features to streamline operations and improve service delivery.
- Integrated a dashboard for administrators to monitor collection status, user feedback, and incident trends, enhancing decision-making and transparency.
- Achieved 99.9% system uptime and reduced server response time to under 200ms.

SafyZone - Crowdsourced Safety Mapping Web Application | NodeJS

Repository

A real-time safety platform leveraging crowdsourced data to improve urban security and awareness.

- Developed a Node.js web application to collect and visualize safety-related incidents, enhancing situational awareness for citizens and authorities.
- Implemented a reporting system that enabled 200+ daily incident submissions with location tags and media uploads,

- boosting situational awareness by 40%.
- Designed dynamic heatmaps for 10+ high-risk zones, facilitating rapid response and resource allocation.
- Generated AI-based safety scores for 50+ routes using incident density and user feedback, offering actionable insights for safer navigation.
- Optimized map rendering speed by 50%, reducing load times from 4s to 2s for a smoother user experience.
- Integrated a community verification system that validated 85% of reports through user comments and votes, enhancing data accuracy.

Fundsmama | [ReactJs, Tailwind](#)

[Link](#)

- Designed and developed a modern landing page using React.js and TailwindCSS, enhancing brand visibility and user experience for the client.
- Deployed the application on AWS, leveraging services like EC2 and S3 for scalable and secure hosting with 99.9% uptime.
- Delivered the project within tight deadlines, collaborating directly with the client to meet design and functionality requirements, resulting in a 100% satisfaction rating.

DMR | [Bash, HTML, CSS](#)

- Developed a comprehensive database monitoring report for over 40 MySQL and PostgreSQL instances across cloud and on-prem environments.
- Automated health checks, performance metrics, and alerting using custom scripts and AWS CloudWatch, reducing manual monitoring efforts by 70%.
- Enabled real-time visibility into query performance, storage usage, and uptime, improving operational efficiency and incident response.

TECHNICAL SKILLS

Programming Languages: Java, C, C++, Python

Back-End: Next.js, Node.js, Express.js, RESTful API

Front-End: HTML, CSS, JavaScript, Tailwind, React.js

Databases: MySQL, MongoDB, PostgreSQL, RDS

Tools: Git, GitHub, AWS

CERTIFICATION

Introduction to CISSP Security Assessment & Testing and Security Operations

[Link](#)

SimpliLearn | GITL

- Gained foundational knowledge in evaluating security controls, conducting audits, and managing operational security processes.
- Applied principles of risk management, incident response, and continuous monitoring in simulated enterprise environments

Certified Cloud Security Professional(CCSP)

[Link](#)

SimpliLearn | GITL

- Acquired expertise in cloud architecture, data security, and compliance across major platforms like AWS.
- Demonstrated proficiency in securing cloud environments, managing identity and access, and applying risk management principles.

C and C++ Certification

[Link](#)

Keerti Computer Institute

- Gained hands-on experience in structured programming, memory management, and object-oriented concepts.
- Built foundational logic and problem-solving skills through practical projects and exercises in C and C++.

ACHIEVEMENT

- Finalist, Odoo Combat 2024.
- Winner, College Hackathon 2024, D.G. Ruparel College.
- Finalist, AceHacks 2024.
- JD NCC Certificate
